## Clarity in a High Definition World.

The world around us is digital! Technology has allowed our TVs, phones, laptops, tablets, and watches to progress; we have the most megapixels, highest resolution and the most unique tools that connect us quickly and clearly. Did you know the same goes for your Vision?

With Autograph III® - SV, we incorporated our most advanced technologies to ensure that your view of the world around you is the clearest it can be. With digital manufacturing and by incorporating your measurements, lenses don't get more precise than this.

### THE DIFFERENCE IS CLEAR WITH DIGITAL

## Created Based on Your Measurements.

It doesn't get more personalized than the Autograph III® - SV. Your lenses are fine-tuned based on the measurements that your eye care professional provides for your selected frame. Whether you wear your glasses high on your bridge or your frames have an extreme tilt, your Rx lenses are optimized to fit *you*.

## The Widest Clarity for Your Rx.

Imagine a world where your lenses allow you to see more, when the prescription you previously had did not. This is the success behind the Autograph III® - SV.

If you have a higher prescription, be prepared to enjoy more clarity, all thanks to a revolutionary technology called EyePoint Technology III®. It's the technology that provides you with wider clear vision.

### ENJOY WIDER CLEAR VISION

CONVENTIONAL SINGLE VISION LENS
