Important News and Information from Columbia Eye Clinic • Summer 2015

Derrick A. Huey, M.D. joins Columbia Eye Clinic

The fourteen physicians and more than 100 staff of Columbia Eye Clinic welcome Derrick A. Huey, M.D. to the practice. He is excited to relocate to the Midlands to join the largest and most advanced medical surgical Ophthalmology practice in the Midlands after practicing in Charleston.

Dr. Huey specializes in Ophthalmic and Cataract Surgery and comprehensive Ophthalmology. His clinical interests include:

- Presbyopia and Astigmatism Correcting Cataract Surgery,
- Medical and Laser Management of Glaucoma,
- Dry Eye Management,
- Pterygium Excision,
- Management of Ocular Inflammation and Uveitis.

Derrick A. Huey, M.D.

He will see patients at Columbia Eye Clinic's three conveniently located offices in downtown Columbia, Northeast Columbia and Lexington.

Dr. Huey completed his Residency at the Medical University of South Carolina Storm Eye Institute in Charleston, SC where he served as Chief Resident for ocular trauma management. He earned his M.D. and completed his Internship at the Medical University of South Carolina-Charleston, SC. He graduated from the College of Charleston-Charleston, SC with a B.S. He is a member of the American Academy of Ophthalmology, American Medical Association, South Carolina Medical Association and Alpha Omega Alpha Medical Honor Society. ●

Columbia Eye Clinic Implements Electronic Medical Records

On June 15, 2015, Columbia Eye Clinic began implementation of electronic medical records at all three of our locations. You will still receive the same unparalleled level of care from our staff and physicians, but you may notice a few changes when you come in for your next appointment. We may ask you to sign an electronic tablet, or you may notice our technicians entering information from your exam into a secure computer system. We appreciate your patience while our staff becomes familiar with the new system. ●

Dr. Ed Mintz Cuts A Rug in Support of Lexington School District One

Thank you to all our patients who voted Dr. Ed Mintz the Dancing with the Stars of Lexington **#1 People's Choice** through your generous donations to the Lexington School District One Educational Foundation! Congratulations to Dr. Mintz who also won third place for his dance performance at the event.

Styled after the popular TV show, Dancing With The Stars of Lexington is an annual fund raising event of the Lexington County School District One Educational Foundation. Dr. Mintz was paired with a professional instructor and competed against 12 other "star" supporters of Lexington School District One to raise funds for district programs and initiatives that are outside the scope of the district's budget. Supporters made donations online prior to the event to cast a vote for their favorite dancer. Competitors and their instructors then strutted their stuff on-stage at the Township Auditorium on May 5, 2015, where fundraising and dance performance winners were announced.

Dr. Mintz extends his sincere thanks to everyone who cast a vote for him in support of the Lexington One schools. ●

Experience the digital difference

The Optical Shops at Columbia Eye Clinic offer the most advanced digital lens technology available. Our custom single vision, bi-focal, or no-line progressive lenses by **Shamir** can help you experience wider fields of view, crisper distance vision and easier transition through all your viewing fields that is more like natural sight. Consult one of our licensed and board-certified Opticians to see which digital lenses are right for your lifestyle.

Digital Single Vision Lenses

Best used in slightly heavier prescriptions above +/- 2.50 or 3.00, our digital single vision lenses are fully customized for your prescription, frame selection, eye measurements, and position you wear your frame. This lens maximizes the lens surface for edge to edge clarity. Our patients who have previously disliked wearing glasses because of poor peripheral vision, especially contact lens wearers, have been astonished by the undisturbed, consistent vision all the way across this lens. Digital technology allows the prescription to be more accurate and will give you the best vision, much like you experience during your eye exam.

Autograph II Progressive Lenses (No-Line Bi-Focals)

Autograph II is our best progressive lens (also known as no-line bifocals) and is fully customized down to the millimeter for your prescription, frame selection, eye measurements and position you wear your frame. You will experience significantly wider fields of view, crisper distance vision, and an easier transition as you move through different viewing zones, which feels much more like natural vision.

Spectrum Progressive Lenses (No-Line Bi-Focals)

The Spectrum lens offers many of the advanced features of the Autograph II lens, at a more affordable price point. This lens offers an outstanding value with many features of a more expensive lens.

Duo (Line-Less Bi-Focals)

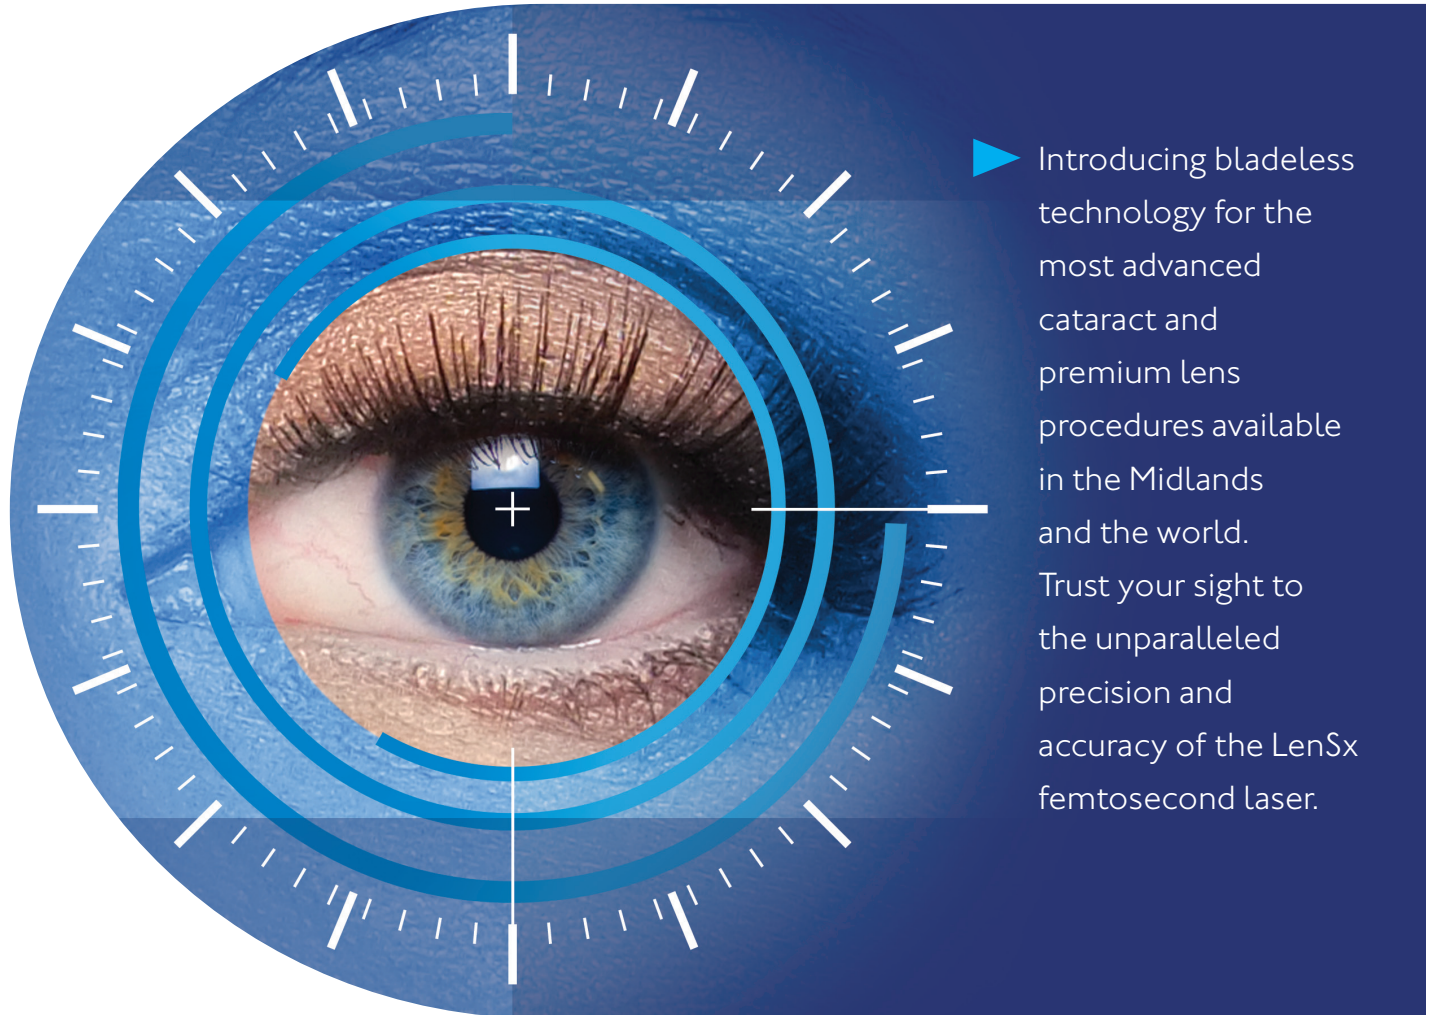

Duo lenses are a great new alternative for lined-bifocal wearers who cannot get used to progressives, but prefer the look of a no-line lens. These lenses are the world's first true "line-less bifocal" lens.

Golf Progressive Lenses

This lens is designed specifically for golf, optimizing your near, mid-range and far vision ranges while also providing clear peripheral vision. Finally, a lens for golfers with a progressive lens to make play more comfortable and improve your score! ●

See the future.

▶ Introducing bladeless technology for the most advanced cataract and premium lens procedures available in the Midlands and the world. Trust your sight to the unparalleled precision and accuracy of the LenSx femtosecond laser.
